HEADLINE: Author Exposes Self-Help Guru's "Stalker's Protocol" in New Thriller Based on Twelve Years of Harassment Using Surveillance. And He's Still Being Stalked Today

SUBHEADLINE: After police, courts, and family dismissed him as "paranoid," Cole Pierce documented 247 videos of evidence. Now he's using a book as his only weapon to fight back.

LEWISTON, ME — March 5, 2026 — It started with a single "click."

November 2014, Cole Pierce walked down his back stairs and heard an electrical snap buried in the brick wall. He told himself it was nothing. Then his home began clicking fifty times a day, from eight different locations in his bedroom alone.

What followed was twelve years of psychological warfare. Hidden cameras in his bedroom. His car bugged. His phone, computer, and television hacked. Fifty clicks a day became the soundtrack of his life. His most private moments were watched, recorded, and mocked.

When he went to law enforcement, they suggested psychiatric help. When he hired a private investigator, the report mysteriously disappeared. When he filed a protection order, a judge ruled the surveillance was real but he couldn't prove *who* did it.

The man responsible? A millionaire self-help guru who'd promised to transform Pierce's life after Pierce gave him over \$100 million in ideas and impressed him with his extraordinary gifts at a 2014 seminar. Cole also transformed a homeless man with one session.

"I thought I'd found a mentor," says Pierce. "But when I applied for a job, my house started clicking. When I confronted him about the stalking, he admitted it, and made fun of my love life. He mocked my most private moments. The last thing he said to me was four words I'll never forget: 'You're not going anywhere.'"

Pierce thought the stalking would last a few months. It's been nearly twelve years.

He's still being stalked today.

The Evidence They Couldn't Destroy

Pierce moved ten times, trying to escape. In every location, the surveillance followed. But he did something no previous target had done: he documented everything.

Over twelve years, he collected:

- **247 videos** of bug detectors signaling hidden devices
- **RF signal detector readings** and **non-linear junction detector** evidence
- **A recording of 30 "clicks" in 30 minutes**—undeniable proof of active monitoring
- **Evidence of computer hacking**, including a man-in-the-middle attack that requires embedded devices on-site

When Pierce confronted the guru, the admission was chilling: He told his staff to "mess with you to make me unsuccessful", and then mocked Pierce's most intimate moments, proving he'd watched everything through those hidden cameras.

Why Cole Pierce Wrote This Book

He wrote this book to fight a multimillionaire stalker, and end a twelve-year nightmare.

Pierce has been surveilled since 2014. He's moved ten times trying to escape. The stalking follows him everywhere. Even his car. They are hacking his phone, his computers and even his TV. They turned every asset into a surveillance weapon.

He can't afford to fight back in court. His stalker has unlimited resources and a team of lawyers. Pierce has 247 videos of evidence and no money to hire attorneys.

The impossible position he's in:

- ✓ He hears clicks all over his house everyday.
- ✓ He has 247 videos of RF detectors signaling hidden devices
- ✓ He has a recording of 30 clicks in 30 minutes
- ✓ He has proof of man-in-the-middle attacks requiring on-site devices
- ✓ His stalker admitted it to his face, then mocked his most intimate moments
- ✗ He has never held a physical bug in his hand
- ✗ The one he found retracted into his walls and vanished
- ✗ Without a device for prosecutors, criminal charges are impossible
- ✗ His stalker's lawyers bury every legal attempt
- ✗ He doesn't have any evidence pointing to the guru
- ✗ He doesn't have the money to fight a multimillionaire stalker

This book is his only weapon.

The courts won't help. Law enforcement won't help. He has no money left to fight.

But he has his story. He has the evidence. He has twelve years of documentation.

And now he asks for your help.

"This book is a desperate act," says Pierce. "I'm fighting for my life with the only thing I have left. The truth. If enough people read it, and share it, maybe I'll finally have the leverage I need to stop the stalking. I need this nightmare to end."

"The Stalker's Protocol": A Warning and a Weapon

Pierce's new book, *THE STALKER'S PROTOCOL: How Duncan Stone Used Surveillance and Psychological Warfare to Destroy My Life*, is a thriller based on real events. This is a real-life stalking horror story.

The book includes:

- A detailed account of twelve years of abuse and harassment
- Never-before-seen video evidence of surveillance (accessible via the website)
- The methodology of how this self-help guru operates

"This book is my testimony," says Pierce. "And my warning. If it happened to me, it can happen to anyone. The difference is, I kept fighting. I kept writing. And now this book is my only weapon."

About the Author

Cole Pierce survived twelve years of stalking and psychological warfare by a self-help industry predator. He holds nine certifications in Neuro-Linguistic Programming and transformation coaching and now helps others who have experienced narcissistic abuse. He lives in Lewiston, Maine. *THE STALKER'S PROTOCOL* is his first book.
